

PSDiver SURVIVAL Workshop

Hosted by:

North Jersey Regional Scuba Task Force

November 1- 3, 2019 - Lyndhurst, NJ

You are 50' underwater. Visibility is zero. Your forward momentum has stopped. You are tangled on something and as you reach into the darkness, your arm is trapped in the rusty barbwire bundle you just swam into.

You can't move. You can't see. You are breathing faster....

Resistance is building with each breath.

Before you can signal you are in trouble your *regulator quits delivering air.*

Where and when will your next breath of air come from if it comes at all?

What will you do? What CAN you do?

The PSDiver Survival Workshop is a 20 hour program that includes 2 full days of in-water training. Experience a new way to evaluate risk, assess hazards and learn skills and equipment configuration designed specifically to increase your odds of surviving a diving emergency.

This is NOT a sharks and minnows class - or a scuba certification class, this IS a Diver SURVIVAL Workshop.

ARE YOU UP TO THE CHALLENGE?
